ABSTRACT

LIST OF FIGURES

LIST OF TABLES

LIST OF ABBREVIATIONS

Phase#1

Chapter 1: Introduction

(Explain and cite all the sections and subsections, including the Figures and Tables)

1.1 Background of Related Projects

1.2 Project Description

1.3 The Benefits of Research Related to the Industry

1.4 Project Problem Statement

1.5 Project Goals and Objectives

1.6 Project Scope and Limitations

1.7 Project Proposed Solution

1.8 Project Software Development Model

1.9 Project Hardware, Software Tools, and Specifications are used in the Project.

1.9.1 Project's Hardware.

1.9.2 Project's Software.

Chapter 2: Literature Review

(Review and cite at least 20 research journals/conferences papers related to the project proposal dated from 2014 to the present time)

Chapter 3: Research Methodology:

3.1 Introduction

3.2 Review related research work to find a possible gap or missing research work to be done.

3.3 Study the current technique(s)/algorithms related to… to find out the level of effectiveness that was achieved.

3.4 Study and examine differently…

3.5 **Build a new algorithm(s) for** …

3.6 Description of the proposed system design

3.7 Description of Experimental System Design

3.8 Description of measurement and data analysis (i.e., in size, in processing time, quality of the output)

3.9 Error compounding testing

3.10 Method of presentation of the output Results (i.e., in a file, on screen, SMS, etc.)

3.11 Discussion

Phase#2

Chapter 4: Project Setup, Testing, Results, and Discussion

(Explain and cite in the text of all the sections and subsections, including the Figures and Tables)

4.1 Project developing a prototype/simulator using the newly defined technique to ….

4.2 Project Design Approach Testing

4.3 Project Verification and Validation

4.4 Discussion of the final output results in terms of size, processing time, and quality of output.

Chapter 8: Conclusion, Future Research Works, and Remarks

References

General Guidelines of report text

All report text, Figures, and Tables should appear on only one side of each sheet of paper. All pages other than the cover sheet should have **page numbers** that begin with "1" on the first page after the title page and should continue through the last page of the reference page, but not the appendices.

The **right-hand margin should be** 1.5 cm, and the upper and **lower margins** 2 - 2.5 cm. The left-hand margin must be 4 cm on each page of the document because of the binding. The margin instructions should be followed in the appendices as well.

The **font size in the text should be** 12, in **subsections** 12, and in **the main headings** 14. The main headings are to be written in capitals and placed at the beginning of a new page. All headings are to be in bold letters. Leave two empty lines under the main heading, two empty lines above the subsection, and one empty line under it. The headings should not have more than three numbers. A **line spacing** of 1.5 should be used in the text, 1 on the title page, and in the abstract. The **font to be used is Times New Roman**. The page number is placed in the lower right corner.

The text should not be indented, and both margins on the page **should be justified.** When a paragraph continues to the next page, at least two lines of the paragraph should be left on the upper or lower end of the page. The paragraphs are separated from each other and the headings with one empty line. A new chapter is started on a new page. **One empty line is needed** to separate two paragraphs.

TEXT

The text of the report should be written in complete sentences. The style should be formal. Formal style means avoiding slang, clichés, and abbreviations that are common in spoken English or advertising. It is a convention that formal reports are written in the third person.

Each chapter should be on a new page.

FIGURES AND TABLES

All Figures and Tables should have a number and a caption. If a figure or table is extracted from a source, the **source should be cited in the references**.
